Rezoning Petition - 114 Church Street

(Citizen Petition, Mark Vaughan for developer)

MOTION: MOVED AND SECONDED that the Town vote to approve Article 39 as printed in the warrant.

BACKGROUND: *The petitioner is seeking to rezone this 1.5+/- acre parcel from the existing SCI (Conservancy-Institutional District) to the RB-20 (Apartment House Residential District). The property (114 Church Street) is located at the corner of Church Street and Glen Road and is presently zoned SCI, given its past use as a religious institution (The First Church of Christ). The existing church building was designed by the architect Royal Barry Wills and has been determined to be historically significant by the Winchester Historical Commission. The petitioner has explored different redevelopment options for the property, and is considering a redevelopment option which would allow for the adaptive reuse of the existing church building for five (5) residential units, together with thirteen (13) additional townhome residential units to be constructed elsewhere on the property. In addition to preserving the church building, the petitioner intends to preserve and maintain the open space and existing signature trees at the corner of Church Street and Glen Road which serve to define that corner and the existing church building's placement thereon. In order to accomplish this, since the existing SCI zoning does not allow for residential use, we have submitted this article to rezone the property to the RB-20 (Apartment House Residential District) in order to allow for this reuse.*

Pursuant to the RB-20 zoning, any proposed residential use would require a Special Permit from the Zoning Board of Appeals (ZBA). This Special Permit process would require a public hearing before the ZBA, with notice to abutters, and the ability for other Town boards and departments to comment on the application.
